

Artwork by our customers, from left—"Zen Thoughts III" by Donna Watson. "Still Life #1" by Carolyn Ellingson. "Virginia #4" by Lyall F. Harris.

NEW DANIEL SMITH Arthaus Frames by Nielsen

The frame that reflects today's design trends. Sharp, simple lines. Painstaking attention to detail. Nothing superfluous. In short, the perfect frame to accentuate your posters, prints, photographs and other artwork. Made of strong, perfectly finished extruded aluminum, the frame has a dramatic deeper profile to accommodate different matting styles and smooth sides for a completely clean appearance.

DANIEL SMITH Metal Frames 95 by Nielsen

Style 95

Style 95 is deep enough to accommodate canvases stretched on *standard* stretcher strips. This versatile modern profile has a wide face and squared edges. The first four colors have a smooth, matte anodized finish. Brite Black-Brushed has a lightly-textured finish which suggests a straight, subtle wood grain.

HOW TO ORDER FRAMES

All Frames are Priced in Pairs and ordered in the overall dimension of your frame.

- 1. Calculating Frame Dimensions:** Order your frames the size of the outer edge of your artwork or glass to the nearest 1/8." We cut frames 1/8" larger than specified for ease of assembly.
- 2. Placing Your Order:** Please give your salesperson the overall dimensions of your frame, (for example, 18" x 24").
- 3. Wood Frame Cuts:** Each frame is custom-cut and the corners of both pairs are routed as a unit. This ensures precisely mitered corners, equal and matching routed grooves, and a close match of color stock.
- 4. Frame Hardware:** Our metal frames come with all the necessary hardware except picture wire. Wood frames come with the Thumbnail® corner system. You'll need wood glue to bond the corner joint, a method of securing your artwork in the frame, frame hangers, and picture wire.
- 5. Frame Sizes:** Due to the nature of our cutting equipment, the minimum frame length we cut is 6". We will cut frames up to 96".
- 6. For artwork on stretched canvas or linen**—measure the overall height and width from the outside edges. You must include the size added by the stretched canvas wrapped onto the sides of your stretcher bars. Pay special attention to the canvas folded at the corners. Make sure the profile you select is deep enough to fully cover the sides of the artwork.
- 7. Frame orders** require two business days for completion prior to shipping.
